DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP 602.01 and 602.02

The oath or declaration is defective because:

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance: with regards to independent claims 1 and 8, the prior art does not disclose nor teach an alarm control panel that includes a "circuit for detecting the presence of transient electromagnetic signals exceeding a magnitude above which some security detectors can falsely produce a signal indicative of an alarm condition, said processing arrangement temporarily interrupting the determination of an alarm condition when said circuit arrangement detects the presence of such a transient electromagnetic signal."

With regards to independent claim 11, the prior art does not disclose nor teach a security system that uses a separate circuit to detect the presence of transient electromagnetic signals, such as lightning, and thereupon interrupting or ignoring the occurrence of signals originating from a plurality of security sensors operably attached to the security system.

With regards to independent claims 15 and 20, the prior art does not disclose nor teach an alarm control panel having a "separate detecting circuit response to the presence of naturally occurring transient signals and providing to said processing arrangement a caution signal in addition to and independent of said alarm signals when a transient signal is detected,"

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
